

Fantasy Software Release Notes

Repository: <https://github.com/acme-corp/fantasy-software>

This document is **sample data** representing GitHub-style release notes for a single repository.

v2.3.0 — 2026-02-14

Highlights ✨

- New **Quest Mode** for guided onboarding.
- Faster startup and improved print/PDF output.
- Localization updates: ไทย / 日本語 / English.

Added

- `fantasy doctor` command to validate configuration before publishing.
- Experimental feature flag `quest.mode=true`.

Changed

1. Standardized config location to `.fantasy/config.yml`.
2. Improved release note generation for tables and nested lists.

Fixed

- Fixed a crash when parsing tags like `v2.3.0-rc.1`.
- Fixed Markdown escaping for `[` and `]` in headings.

Compatibility matrix

Component	Supported	Notes
macOS	✓	Apple Silicon + Intel
Windows	✓	PowerShell 7 recommended
Linux	✓	Tested on Ubuntu 24.04
GitHub Enterprise	⚠	Requires API base URL config

Notes (mixed languages)

- English: If you see `HTTP 403`, check token scopes.
- ไทย: แก้ไขการแสดงผลบันทึกการออกรุ่นให้สวยงาม และปรับความเร็วในการสร้างไฟล์ PDF ✓
- 日本語: リリースノートの生成が改善されました。印刷用スタイルもサポートします。

v2.2.1 — 2026-01-30

Fixed 🐛

- Fixed a regression where `fantasy publish` could hang on slow networks.
- Fixed incorrect compare links when repository URL ends with `.git`.

Security 🛡️

- Bumped HTTP client to improve TLS defaults.
-

v2.2.0 — 2026-01-12

Highlights

- Added **release summary table** output mode.

Added

- `fantasy notes --summary`

Example output:

Version	Date	Key changes
v2.2.0	2026-01-12	Summary tables, better Markdown

Changed

- `fantasy notes` now groups changes by conventional commit type.
-

v2.1.0 — 2025-12-05

Added

- Support for monorepo package selection via `--package <name>`.

Changed

- Improved heading normalization to avoid duplicate anchors.

Fixed

- Fixed an issue where empty sections were still emitted.
-

v2.0.0 — 2025-11-01

Breaking changes ⚠

1. Renamed CLI binary from `fsr` to `fantasy`.
2. Moved config from `.releaserc` to `.fantasy/config.yml`.

Migration

- Update scripts:
 - Old: `fsr notes`
 - New: `fantasy notes`
-

v1.9.0 — 2025-09-10

Added

- GitHub Actions helper snippets for release pipelines.

Fixed

- Fixed formatting for nested bullet lists in GitHub Markdown.
-

v1.8.0 — 2025-08-01

Highlights

- Initial support for multiple languages in generated notes. 🌐

Notes

- ไทย: เพิ่มการรองรับข้อความหลายภาษาในบันทึกการออกรุ่น
 - 日本語: 多言語メッセージのサポートを追加しました
-

v1.7.2 — 2025-07-10

Fixed

- Fixed date parsing when system locale is not English.
-

v1.7.0 — 2025-06-20

Added

- `fantasy init` interactive setup wizard.

Changed

- Default output file for `fantasy notes` is now `RELEASE_NOTES.md`.
-

v1.6.0 — 2025-05-02

Added

- Improved linkification for PR references like `(#123)`.
